## **RUDATAPE<sup>®</sup>**

### **REF 070003**

# Product Description, Intended use, Application

The non-elastic white tape (3.8 cm x 10 m) is provided with a zinc oxide adhesive which develops its highest adhesive strength at body temperature. Owing to its special fabric structure, RUDATAPE<sup>®</sup> is easy to tear. It is used for functional tape bandages for support and relief in the field of surgery and orthopedics. In case of wounds, they are covered with a suitable wound dressing first.

### Composition

Viscose, zinc oxide adhesive (colophoniumfree)

### Contraindications

Do not use in case of extensive haematomas, extensive skin injuries and a known allergy against the material.

### **Incident reporting**

According to MDR (EU) 2017/745, if serious incidents occur in relation to the device, they must be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.

### Normative and Legal Requirements

RUDATAPE<sup>®</sup> is a medical product according to directive MDD 93/42/EEC and the regulation MDR (EU) 2017/745 and is classified as class I, rule 1.

The product does not contain dangerous toxic substances according to REACH.

Date of information: May 27, 2021 [REV 7] replaced: April 01, 2020 [REV 6]
