## RUDADERM ${ }^{\circledR}$-junior

REF 091206

## Product Description, Intended use, Application

The plaster stripes consist of a carrier material ( $1.9 \times 7.6 \mathrm{~cm}$ ) which is made of a flexible, airpermeable plastic with colorful animal motifs and is provided with a hypoallergenic adhesive. The non-sticking wound pad ( $1 \times 1.7 \mathrm{~cm}$ ) is protected all around by the carrier material. The individually sterile packed strips are used to cover primarily healing smaller wounds, injection sites and small punctures (for example vein punctions).

## Composition

Polyethylene, viscose, polyester, polypropylene,
hypoallergenic adhesive

## Incident reporting

According to MDR (EU) 2017/745, if serious incidents occur in relation to the device, they must be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.

## Normative and Regulative

Requirements, Common Standards
Medical Device according to MDD 93/42/EEC, MDR (EU) 2017/745.
The product does not contain dangerous toxic substances according to REACH.

## Packaging

Primary packaging: Paper packaging
Secondary packaging: folding box
made of cellulose
Teritary packaging: Carton made of
Cellulose

Symbols used in labelling<br>Explanations at www.nobamed.com

Marking on all packaging levels with CE and according to DIN EN ISO 15223-1- and DIN EN 1041.

## Storage and Transport

Dry and dustfree.

## Sterile device

Before using a sterile product, visually inspect the packaging to ensure that it is intact.

## Single use device

Reusing a single use medical device can lead to microbiological danger. Reprocessing for reuse can decrease the product's performance significantly.

## Disposal

According to locally applicable legal regulations and standards of infection prophylaxis.
