

NOBATUB®

REF 340104

Product Description, Intended use, Application

The white, permanently elastic tubular bandage, size D (7.5 cm x 10 m), is soft, conformable, skin-friendly and transversely elastic. NOBATUB® serves as an underlay to protect the skin when rigid cast bandages made of plaster or synthetics are applied. Owing to its enormous elasticity it can support ligaments and musculature after sports injuries. The material is likewise suited for self-made special bandages according to Desault or Gilchrist. Orthosis or braces, which are made of polyester or fibre glass, can be fixed by means of NOBATUB®.

NOBATUB® may likewise be used to fix wound pads with a slight compression effect. The rolled bandage is for single use and is individually packed.

Composition

Cotton, elasthane and nylon

Contra-Indications

The product should not be used in the case of a known allergy against the material.

Notes

The product has been subjected to a validated microbial reduction process and is therefore pre-sterilized.

Incident reporting

According to MDR (EU) 2017/745, if serious incidents occur in relation to the device, they must be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.

Normative and Regulative Requirements, Common Standards

Medical device according to the MDD 93/42/EEC and MDR (EU) 2017/745.

The product does not contain dangerous toxic substances according to REACH.

Packaging

Primary packaging: folding box made of cellulose

Secondary packaging: carton made of cellulose

Symbols used in labelling

Explanations at www.nobamed.com

Marking on all packaging levels with CE and according to DIN EN ISO 15223-1 and ISO 20417.

Storage and Transport

To be stored in a dry and dust-free environment

Single use device

Reusing a single use medical device can lead to microbiological danger. Reprocessing, for reuse can decrease the product's performance significantly.

Disposal

According to locally applicable legal regulations and standards of infection prophylaxis.
