

NOBATRAST®-Vakuum-OP-Set Präpariertupfer

REF 645712

Product Description and Purpose

The double packed preparation balls made of 24-thread dressing gauze, 12 cm x 12 cm, (size XL), packed per 20 pcs, have a woven-in X-ray thread. They are used to prepare delicate tissue in the surgical field (for example blood vessels, fine tendons). The balls are separately placed in a transparent tray, thus enabling a visual content check before the operation. Owing to a yellow counting card on the inner packaging and a second yellow counting card on the inner side of the outer packaging, the counting may be checked quickly and safely. The vacuum of the inner and outer packaging guarantee the sterility of the set until it is used.

Contraindication

Allergy against cotton, barium sulfate, PVC or DINP

Composition

Cotton, X-Ray thread contains barium sulfate, PVC and DINP

Normative and Legal Requirements
