Product Description and Purpose

The wet, hand-shaped washing gloves are used for the professional whole-body washing especially of lying patients. The washing gloves replace water, soap and towel. They are pH skin neutral, with Aloe, and therefore gentle to the skin. By systematic use of exactly 8 gloves for the different areas of the body, cross-contamination from one area to another can be prevented. The washing gloves can be heated in their package in the microwave at 700 watts for 40 seconds.
