

## WUNDSCHNELLVERBAND

REF 726606

### Product Description, Intended Use Application

The WUNDSCHNELLVERBAND of size 6 cm x 8 cm is a first-aid dressing in which an aluminium-coated non-woven compress is attached edge-to-edge to an elastic fixation bandage. Furthermore, it is designed in such a way that the injured person can take care of himself in a sterile manner, as the elastic bandage is provided with adhesive plaster strips at its two ends so that the dressing can be fixed to the skin and also at bandage end. Due to the porous structure of the aluminium layer, wound secretions can be rapidly transferred into the absorbent core of the compress. The WUNDSCHNELLVERBAND is used for the quick and sterile treatment of small to medium-sized wounds in first aid. The product is intended for single use and is individually sterile packed.

### Composition

Polyethylene, aluminium, viscose, polyester, polyacrylic adhesive

### Contra-Indications

The product should not be used in the case of a known allergy against the material.

### Incident reporting

According to MDR (EU) 2017/745, if serious incidents occur in relation to the device, they must be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.

### Normative and Regulative Requirements, Common Standards

Medical Device according to MDD 93/42/EEC, MDR (EU) 2017/745.

Sterilization of the product complies with DIN EN 11135.

The product does not contain dangerous toxic substances according to REACH.

### Packaging

Primary packaging: paper-film packaging

Secondary packaging: folding box made of cellulose

Tertiary packaging: carton made of cellulose

### Symbols used in labelling

Explanation at [www.nobamed.com](http://www.nobamed.com)

Marking on all packaging levels with CE and according to DIN EN ISO 15223-1- and DIN EN ISO 20417

### Storage and Transport

Dry and dustfree

### Sterile device

Before using a sterile product, visually inspect the packaging to ensure that it is intact. (Abschnitt bei Bedarf)

### Single use device

Reusing a single use medical device can lead to microbiological danger. Reprocessing for reuse can decrease the product's performance significantly.

### Disposal

According to locally applicable legal regulations and standards of infection prophylaxis.
