

MULLTUPFER

REF 877004

Product Description, intended use, application

The gauze balls have a diameter of 1.0 cm. The gauze (DIN EN 14706 type 20) is twisted into a round shape without using any rubber ring. They are used for the treatment of wounds and for skin disinfection. Prior to these activities, the product has to be sterilized with a validated procedure (moist heat at 121°C / 134°C, 2 to 3 bar, according to DIN EN ISO 17665, radiation according to DIN EN ISO 11137 or ethylene oxide according to DIN EN ISO 11135).

Composition

Cotton

Note

Sterilize before use

Incident reporting

According to MDR (EU) 2017/745, if serious incidents occur in relation to the device, they must be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.

Normative and Legal Requirements
